

## II. AMENDMENTS TO THE SPECIFICATION

**1. Please replace the immediate prior version (the original) of the Abstract with the following:**

A support pocket with a conformable pouch having an elastic back is secured to the inside front of a man's brief~~includes a conventional main body with front openings flaps for conventional access when wearing the brief; and an inside support pocket. The pocket is established with a lower conformable, upwardly curved pouch connected to the inside front of the main body and a pair of flaps extending upwardly from opposite sides of the pouch. An elastic back edge is provided on the edge of the pouch to establish a lower elastic opening to the pouch from the back side. The~~A pair of flaps extending upwardly from the opposite sides ends of the elastic pouch perimeter to establish the upper perimeter of the opening with the flaps in their closed position, and are movable between a fastened closed position overlapping one another and laying flat against the inside front panels of the brief~~main body generally, and an open position separated laterally from one another to open the pouch from above. A two-part snap closure, with complimentary snap parts connected to each of the flaps, enable opening and closing the flaps, and thereby opening and closing the pouch for entry from above.~~

**2. Please replace the immediate prior version (the original) of paragraph [0019] with the following:**

[0019] FIG. 2 is a front view of the inside of the men's brief shown in FIG. 1, the brief being shown as turned inside-out for viewing the inside thereof, and showing an integral internal support pocket in accordance with the invention in a closed condition.
